June 2026 Newsletter

Survey Manager App - June 20 26
Newsletter
Subject: Welcome to the Future of Surveying: SurveyBot, QGIS Pro & AI Training!

Dear Surveying Professionals,
Welcome to the June edition of the Survey Manager App Newsletter! This month, we are
thrilled to announce a massive leap forward in how land surveyo rs manage their operations, interact with clients, and leverage Artificial Intelligence.
We've been working hard to build the ultimate digital workspace for modern surveyors.
Here' s a look at what' s new and how you can use these tools to automate the tedious
parts of your day and focus on what you do best.

Introducing SurveyBot: Your 24⁄7 AI Assistant (NEW!)

Say goodbye to missed leads and unanswered client questions when you're out in the
field. SurveyBot is our brand-new , powerful AI chatbot that integrates directly into your
website.
Handle Client Inquiries: Instantly answers common questions about your services.
Capture Leads: Collects contact info and project details from potential clients automatically .
Automate Support: Frees up your of fice staf f by handling routine support tasks.
Want to see it in action? Try the Live SurveyBot Demo today , or sign up to embed it on
your own site!

Survey Manager Pro for QGIS

Stop copy-pasting client data between QGIS, Excel, and Windows File Explorer! The
Survey Manager Pro QGIS Plugin is the complete AI-powered operations systemdesigned specifically to live inside QGIS.
Natural Language AI: Just ask the assistant to "Add a boundary survey" and watch it instantly build the database record.
Integrated Job Folders: Link your Windows project folders directly to map points.
One-Click Invoicing: Generate PDFs with automatic tax calculations and Stripe integration.

Survey Database Manager – Desktop Edition

Prefer to keep things local? Our Standalone Windows App brings all the power of Survey
Manager to your local machine—no QGIS required. Enjoy interactive maps, the AI assistant, geocoding, invoicing, and GIS export in a lightning-fast, local-first desktop
application.

Master AI: Prompt Engineering for Land Surveyors

The surveying industry is changing, and AI is at the forefront. We're excited to launch the
industry' s first interactive AI training course designed specifically for land

surveyors, SITs,
GIS technicians, and firm owners.
What you'll learn in the course:
Automate deed research and reporting (extract bearings, distances, and build chain-
of-title summaries in seconds).
Accelerate CAD & GIS workflows (spin up maps and process spatial data).
Field planning, drone survey automation, and quality assurance.
Understand the ethical boundaries and liability of using AI in surveying.
No boring videos! Learn through 30+ interactive audio lessons, 100+ copy-paste ready
prompt templates, and real-time prompt playgrounds.
Enroll in the Course Today and gain a massive competitive edge. Explore the Wider Ecosystem
We are constantly expanding our suite of digital workspace tools. Be sure to check out our
extended ecosystem, including:
Prep Course: Create courses from a single prompt.
FolderCopilot: Organize your operations ef ficiently .
Elevatr: Professional experience documentation for Surveyors.
Land Surveyor Portfolio: Build your digital online portfolio.
